Descrição da Aula

Contextualização

Percebeu-se no decorrer do curso que apesar de praticarmos a escrita diariamente, há ainda uma necessidade de se praticar não somente na aula, mas também em casa. Pensando nisso, a criação de uma revista online foi o método mais interessante aplicado, pois é possível adicionar textos, vídeos e imagens a um documento online.

Descrição da situação de aprendizagem

Primeiro os tópicos de escrita foram separados de acordo com a necessidade da turma e também do conforto em escrevê-los. Após isso, os alunos tiveram uma semana na confecção do texto. O texto foi sempre revisado pelo professor para que pudesse ser colocado na revista. Houve um feedback constante entre professor e aluno, e também entre os próprios alunos com ideias sobre textos e a escrita em si. Por fim o trabalho da diagramação ficou por conta do professor.

Finalização

Percebeu-se que, ao praticarem a escrita com assuntos de interesse deles, houve um interesse bem maior na confecção de textos. Os alunos interagiram mais, participaram mais e se interessaram mais nos assuntos gramaticais para que pudessem aplicar nos trabalhos de forma satisfatória. LINK: [Link para a revista no Canva](#)
