How to start recycling by Gabi Petrovich

Recycling is the process of collecting and processing materials that would otherwise be thrown away as trash and turning them into new things. And I will teach you creative ways to do it.

Reusing is very important and it brings a lot of advantages. It protects the Ecosystems and Wildlife, conserves our natural resources, it creates jobs and a lot more.

In this book, I will explain what recycling is, but, more importantly, I'll give you the tools to design beautiful things from what some people would call trash.

Recovering is easy, cheap and helps our home. What are you waiting for? Start recycling. Do your part. Be creative. And remember that anything can change into something useful and beautiful.

RENOVATING STRESS FREE. By Adriana Uchôa

Renovating your home or apartment can be very stressful. In this book i'll help you to program yourself to perform a work with much less stress.

Initially, I'll tell you general tips:

1. Keep in mind clarity on what you want.
2. Hire a proffisional to design your project and let him know your budget.
3. Never say the final value. Reduce by 25% what you intend to spend.
4. Hire someone with rererences to execute your work. Already schedule for a longer time as well.
5. Important: Rainy periods delay works. Choose moths without rain.

Now, Let's work.
